

Certificate

of Compatibility for the following BRC Solar optimizers

Power Optimizer M500

Power Optimizer M600-E

Power Optimizer M700-E

with the inverters from Huawei.

The final and approved system configuration of each inverter type is provided in the inverter checker and must be verified there.

<https://brc-solar.de/en/inverter-checker/>

When using BRC optimizers in combination with inverters from this manufacturer, the inverter functions RSD and data monitoring are not available. With active arc fault detection (AFCI) of the inverter, false activations may occur during operation. Without activated arc fault detection, there are no restrictions on the basic inverter functions (feed-in operation).

To confirm trouble-free operation, standardized compatibility tests were carried out. These are repeated at regular intervals with the inverter manufacturers' most current product portfolio to ensure compatibility.

We hereby confirm that the tests were carried out without issues according to the standardized test procedure.
